your guests.
And also
of the planet.

FOREWORD

At JVD, design is more than form. It is intention, experience, and purpose.

For more than 40 years, JVD has been dedicated to caring for guests and enhancing their experience in hotel rooms and bathrooms worldwide. As hospitality continues to evolve, so do the expectations placed on the spaces we create and the objects within them.

Today's guests seek environments that feel intuitive, considered, and quietly refined. Equally, they expect responsible choices that respect resources and reduce environmental impact.

In this catalogue issue, we present four complementary universes, each responding to a distinct need within hospitality, yet united by one shared design philosophy—where performance, aesthetics, and sustainability are thoughtfully balanced.

JVD defines our universe of guestroom appliances—engineered for reliability, safety, and long-term performance, integrating advanced technology, latest-generation design, and modular repair solutions.

ADesign is our creative atelier, where bespoke and design-led solutions take shape in close dialogue with designers and hoteliers, guided by responsible material choices and timeless design principles.

Bloom is dedicated to waste management for guestrooms, back-of-house, lobbies, and communal spaces; enabling cleaner spaces while encouraging more thoughtful disposal and resource management.

Storn embodies operational efficiency - supporting essential hospitality teams behind the scenes through durability, ergonomics, and robustness. Their role, often unseen yet essential, contributes immensely to the quality of the guest experience. By making their daily tasks easier, safer, and less physically demanding, JVD proudly takes a meaningful step in the direction of recognising their value and supporting them with the respect they deserve.

Together, these four universes form a cohesive ecosystem—different in function, united in intent, and aligned with a more sustainable vision of hospitality.

Welcome to this new chapter of JVD.

JVD: PRODUCTS THAT TAKE CARE OF YOU

For more than 40 years, our business has been about caring for the needs of our clients, their employees and their visitors. But our mission goes far beyond simply manufacturing products. To us, “care” is a global commitment, a philosophy that also encompasses responsibility towards the planet.

Our environmental commitment is at the heart of everything we do, and we are very proud that all our efforts in eco-design and sustainability have been rewarded with the prestigious Ecovadis Gold certification. This demanding recognition validates the progress we have made and strengthens our determination to go even further.

Day after day, we work hard to shrink our environmental footprint whilst continuing to innovate and design sustainable products, created with the future in mind.

OUR HAIR DRYERS

PAGES 7-14

MAKE YOUR GUESTS FEEL RIGHT AT HOME

Our hair dryers are elegant and easy to handle, designed to offer maximum comfort to your guests: a good grip on a sturdy accessory, packed with technology for gentle yet efficient drying and a design that leaves no one cold.

PAMPER YOUR GUESTS

Appreciated by more than two-thirds of surveyed guests and a compulsory amenity at hotels with four or more stars, hair dryers have gradually become a must in the field of hospitality. A study by the CMHF (Committee for the Modernisation of French Hotels) showed that hair dryers are the most important bathroom accessories, particularly popular amongst female guests. These handy, powerful and stylish devices give travellers all the convenience they expect, without having to lug their own hair dryers along with them.

UNTANGLE TRUTH FROM FICTION

Choosing a hair dryer is a question of more than just power! Some devices are designed to deliver superior drying quality at more moderate temperatures. So, in addition to protecting delicate hair by controlling the use of speed and heat, these appliances use much less energy, costing you less in turn. Plus, some solutions allow guests to adjust the speed and heat of the hair dryer.

INNOVATE WITH OUR IONISING SYSTEM

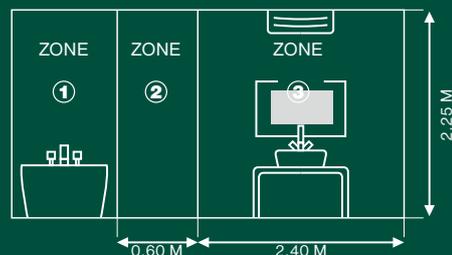

To neutralise the static electricity that can occur in hair during the drying process, some devices are fitted with an ionising system, which dries hair quickly, at a low temperature, without damaging the hair's fibres. The ions generated by this system neutralise static electricity.

PLAN FOR EVERY POSSIBLE USE

Hotel hair dryers are not subject to the same constraints as hair dryers marketed to the general public. Aside from the strict standards they must meet, hotel hair dryers are sometimes used in unexpected, undesirable ways (stolen, used to dry clothes or shoes, etc.). And so, they should be designed to limit those uses (e.g. JVD LighTouch® handle, timer, anti-theft protection, etc.) while still being a perfect fit for any bathroom. They require a dedicated mount, which should feature shaver sockets to meet the needs of an international clientele.

PROTECT EVERYONE'S SAFETY

To prevent any risk of electrocution, standard NF C15-100 defines a minimum distance between your electrical appliances and the main water tap (bathtub or shower). Only hair dryers with hoses can be installed close to this tap (in zone ②). All other devices must be installed no closer than zone ③, or as per each country's respective electrical regulations

OUR MINIBARS

PAGES 38-46

Our minibars are fitted with next gen smart technologies. Whether you choose our thermo-absorption or the compressor systems, our minibars are eco-friendly, reliable and silent.

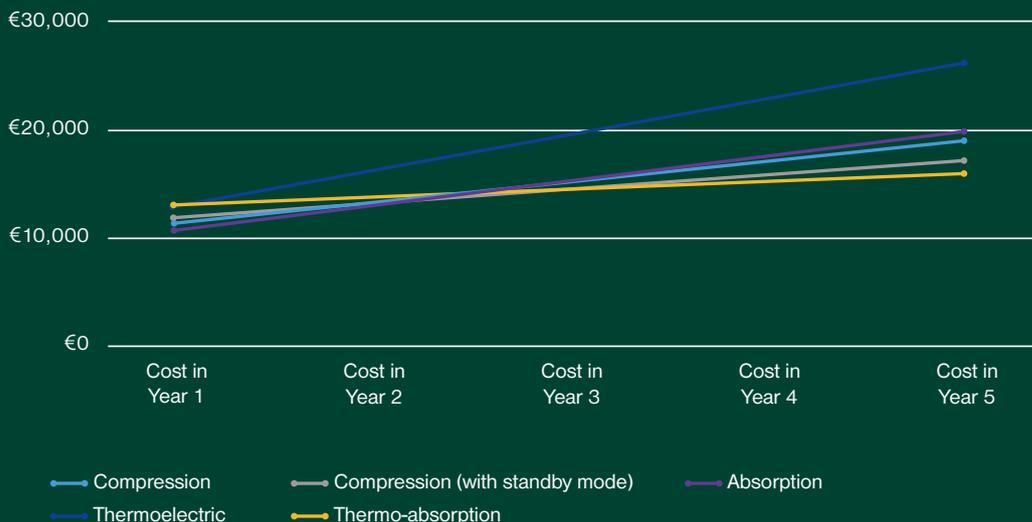

THERMO-ABSORPTION MINIBARS FOR MAXIMUM SAVINGS

Next generation thermo-absorption minibars blend the Peltier effect with absorption to generate cold. They are ecological, reliable and completely silent, consuming 66% less energy.

ABSORPTION MINIBARS FOR MAXIMUM AFFORDABILITY

Compression minibars use a refrigerant to cause cooling by compression. They are effective and offer maximum coldness.

OUR MIRRORS

PAGES 66-74

CHOOSE YOUR MIRRORS WITH CARE

Our mirrors are the result of a special alchemy melding innovation, performance and design. They invite guests to enjoy a unique experience with complete simplicity.

OPT FOR SIMPLICITY WITH NO ELECTRICAL CONNECTIONS

Our Cosmos, Galaxy and Eclips mirrors run on a lithium battery and a three minute auto-off system ensuring longevity of three to five years. These mirrors can safely be installed in any part of a bathroom, since they do not plug in.

SUPPORT FRENCH DESIGNS AND MANUFACTURING

Devised by our Design Department specifically for use in hotel bathrooms, our illuminated mirrors are made in Nantes, France.

PIVOT TOWARDS TILTABLE MODELS

Thanks to their double or triple rotational axis, our mirrors offer your guests the best possible reflection.

ADOPT AN ECO-FRIENDLY STYLE

Our illuminated mirrors are fitted with LED lighting to maximise their lifespan without having to change the bulbs and to reduce their energy consumption.

Adesign

Designed With a Sense of Place

At Adesign, every collection begins with a story – of place, culture, and purpose. Our approach blends aesthetic sensibility with functional design, ensuring every piece enhances both the visual identity and guest experience of a space.

Each curated collection is tailored to reflect local culture and design intent – transforming guestrooms into immersive environments that tell a story. The result is a seamless integration of authenticity, elegance, and functionality, bringing alive the experience of staying in that place and creating lasting impressions for every guest.

This season, we introduce a plethora of bathroom accessories collections crafted from refined, premium materials including marble (Emerald & Russo), glass (Prism), porcelain (Moonridge and Lunaris), hybrid (Matrix) and stainless steel (Gothem). All thoughtfully designed to balance functionality, durability, and style, these pieces offer versatile solutions that seamlessly complement and elevate luxury guestroom environments.

GOTHEM
collection

Each GOTHEM piece is precision-crafted from high-grade stainless steel, finished in warm brushed tones that complement today's premium bathroom fixtures and fittings.

A collection of strength, stability, and timeless modernity

OUR WASTE MANAGEMENT SOLUTIONS

PAGES 126-158

Blöom

ALIGNING WITH LEGAL OBLIGATIONS

European regulations require organisations to properly sort and manage waste.

Companies with office operations or high waste volumes must organise separate streams for paper, plastic, metal, glass and other materials, ensuring compliance with local waste collection requirements.

WASTE SORTING AS CLIMATE ACTION

Unsorted waste cannot be recycled. Effective sorting transforms waste into secondary raw materials and extends their lifecycle. With clear signage and well-designed bins, employees can actively participate in an eco-responsible approach that supports both sustainability goals and environmental impact reduction.

THE RIGHT SOLUTIONS, IN THE RIGHT PLACES

Strategic bin placement encourages correct waste sorting. Position bins near work areas, break zones and shared spaces, and create clearly marked recycling points where people naturally gather. Bloom offers visible, intuitive and easy-to-empty solutions designed to suit different environments and waste volumes.
